

Goes to the site root ("/") when clicked.

Goes to Find a Dealer ("/find-a-dealer") when clicked.

Add a drop-down menu with a slide down animation.

Notes:

* You can view the drop-down menu within the "layer Comp" (on "Window" drop down menu) in the PSD file.

* You can use any javascript framework, library or plug-ins.

* URLs should be lower case, have spaces replaced with dashes ("-"), and be consistent with the text.

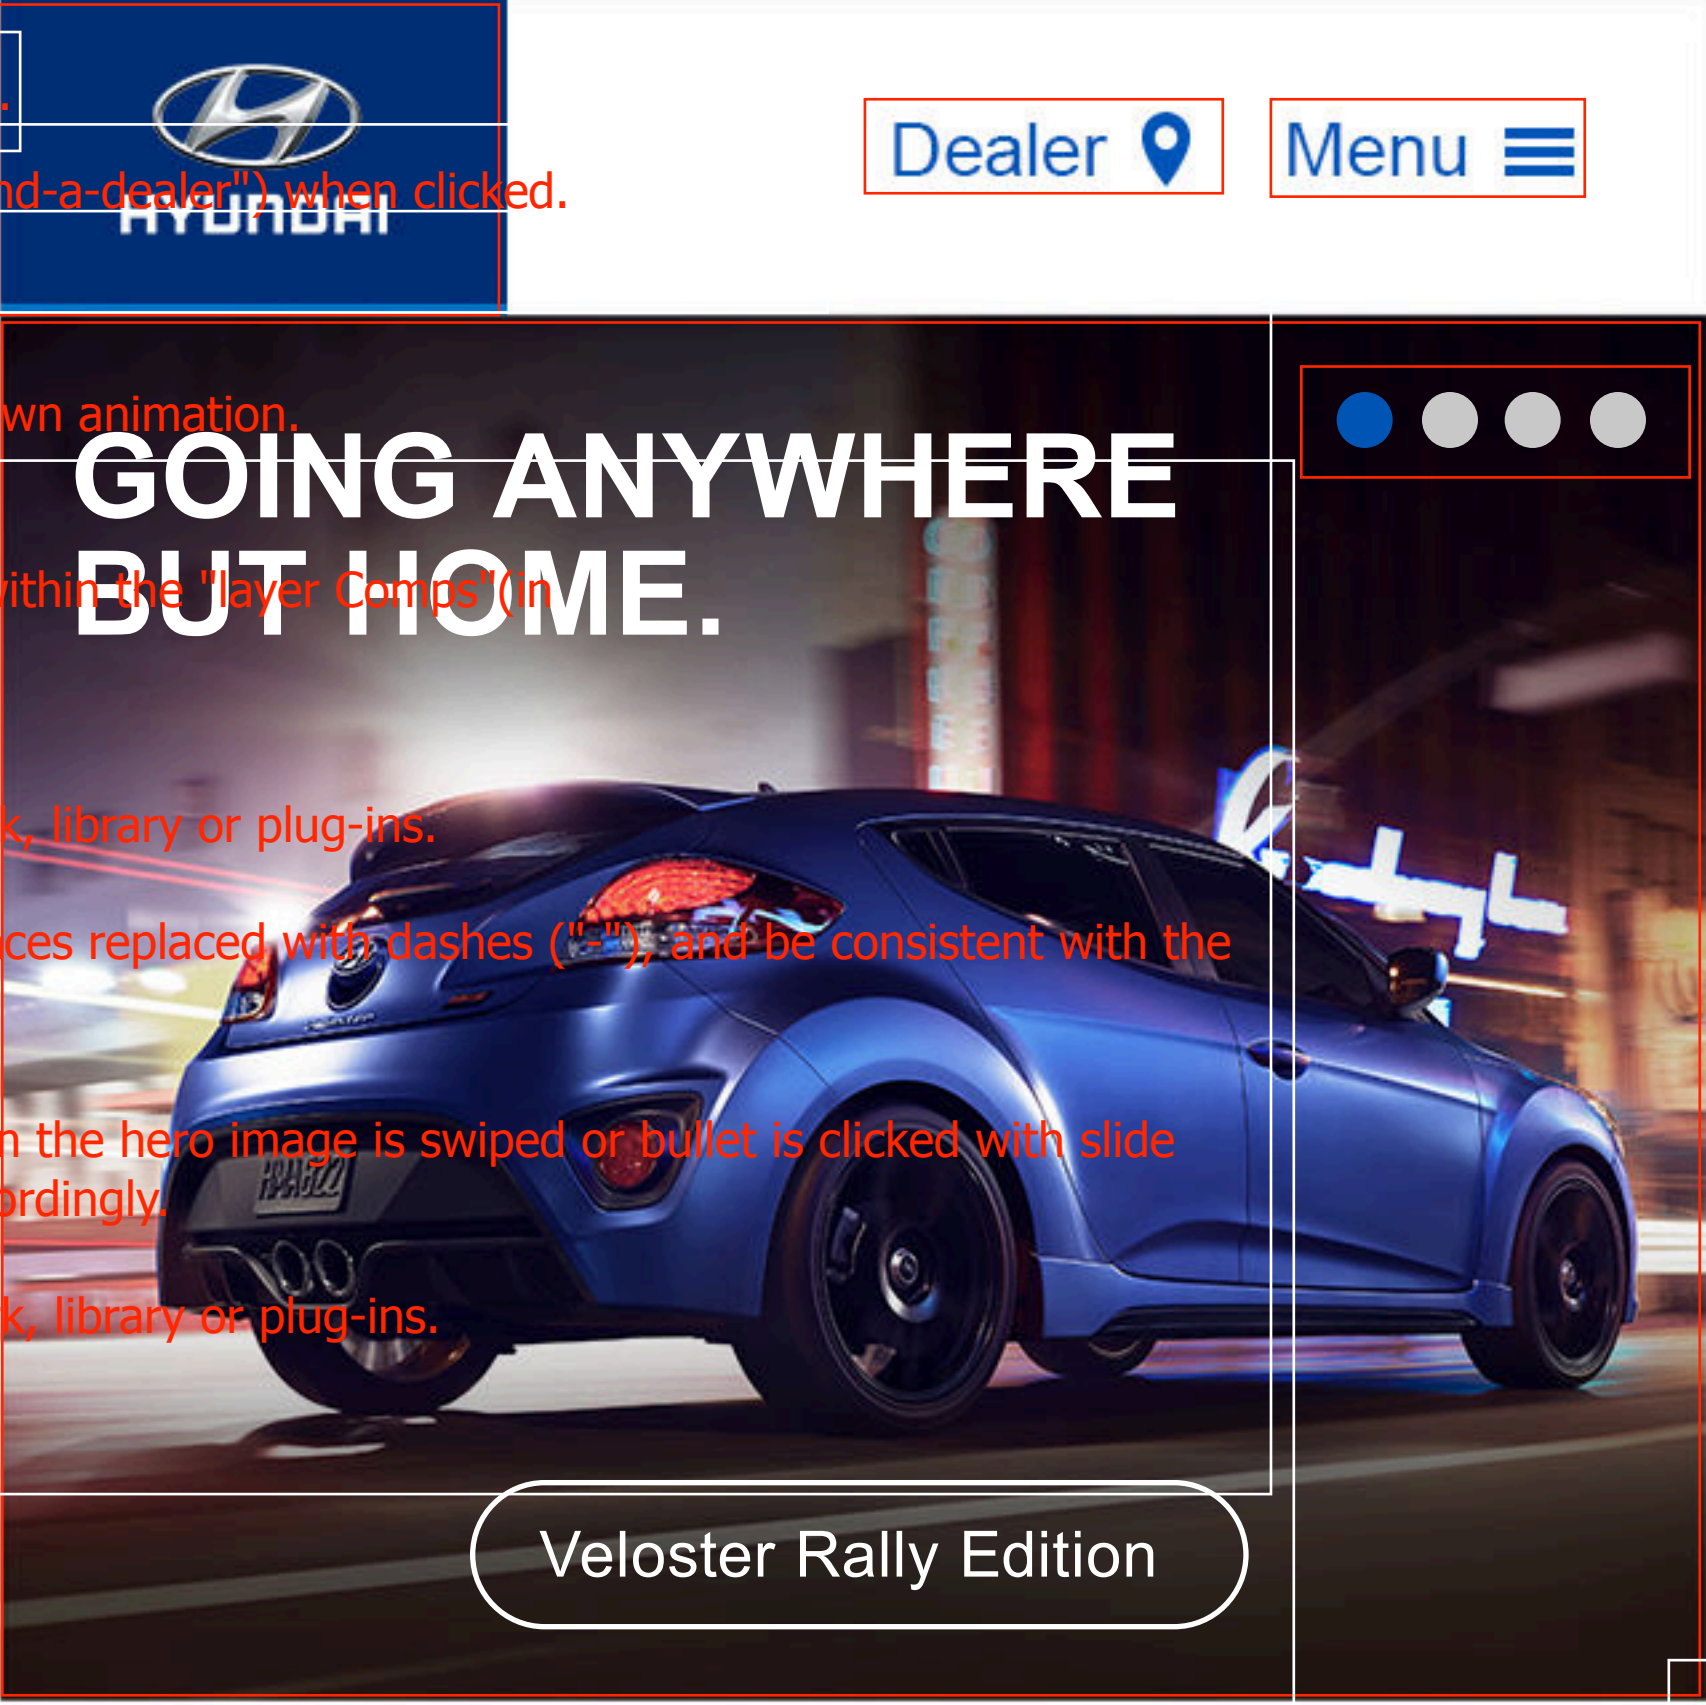

Examples:

- Search Inventory: /search-inventory

- Build & Price: /build-and-price

- Find a Dealer: /find-a-dealer

* You can use any javascript framework, library or plug-ins.

This must be compatible with any mobile device's resolution(ex. iPhone 5&6Plus, Galaxy S5&Note 5, ...) and fit any mobile device's screen width 100%(this comp is for portrait device orientation).

The other comp is a landscape device orientation, which should also fit all of the content 100% except the hero image, and be compatible with any mobile devices resolution.

For those who do not have Adobe Photoshop to extract PSD files, please go to the link below to download a free trial version from the Adobe website (https://creative.adobe.com/products/download/photoshop).

* Please note: PSD to image online converting sites always produce inconsistent results.

Hero images must be swipe-able with touch.

* You can view the hero images within the "layer Comps" in the PSD file.

* You can use any javascript framework, library or plug-ins.

* Use the landscape banner image for both portrait and landscape orientation, but do not change the height. Only crop the sides, and center the image.

* Hero images go to their corresponding vehicle.

- Image 1: /veloster
- Image 2: /sonata
- Image 3: /sonata-hybrid
- Image 4: /tucson

o Veloster ("/veloster") when tout banner is clicked.

Goes to the corresponding vehicle when the vehicle image, model name, or price are clicked.

* Use the same style for all vehicles in this section.

* URLs should be lower case, have spaces replaced with dashes ("-"), and be consistent with the text style.

After clicking 'Use my Location', fill the input 'ZIP Code' with the proper zip code based on the users location. Then automatically go to 'Find a Dealer' with the users zip code ('/find-a-dealer/{current zip code}')

Example:

/find-a-dealer/90001

* Notes:
Use geolocation module

Input should accept 5 numbers. No alphabetic or special characters allowed. 'Go' button goes to 'Find a Dealer' with the users zip code input ('/find-a-dealer/{entered zip code}')

Example:
/find-a-dealer/90001

Goes to Build & Price ("/build-and-price") when clicked.

* Notes:
URLs should be lower case, have spaces replaced with dashes ("-"), and be consistent with the text style.

Examples:

- Search Inventory: /search-inventory

- Build & Price: /build-and-price

- Find a Dealer: /find-a-dealer

Goes to Facebook ("facebook.com/hyundai") when clicked.

*Notes:

Use a similar style for all the social media URLs

Examples:

- Twitter: twitter.com/hyundai

- Instagram: instagram.com/hyundai

- YouTube: youtube.com/hyundai

- Google+: plus.google.com/hyundai

Goes to Contact Us ("/contact-us") when clicked.

* Notes:

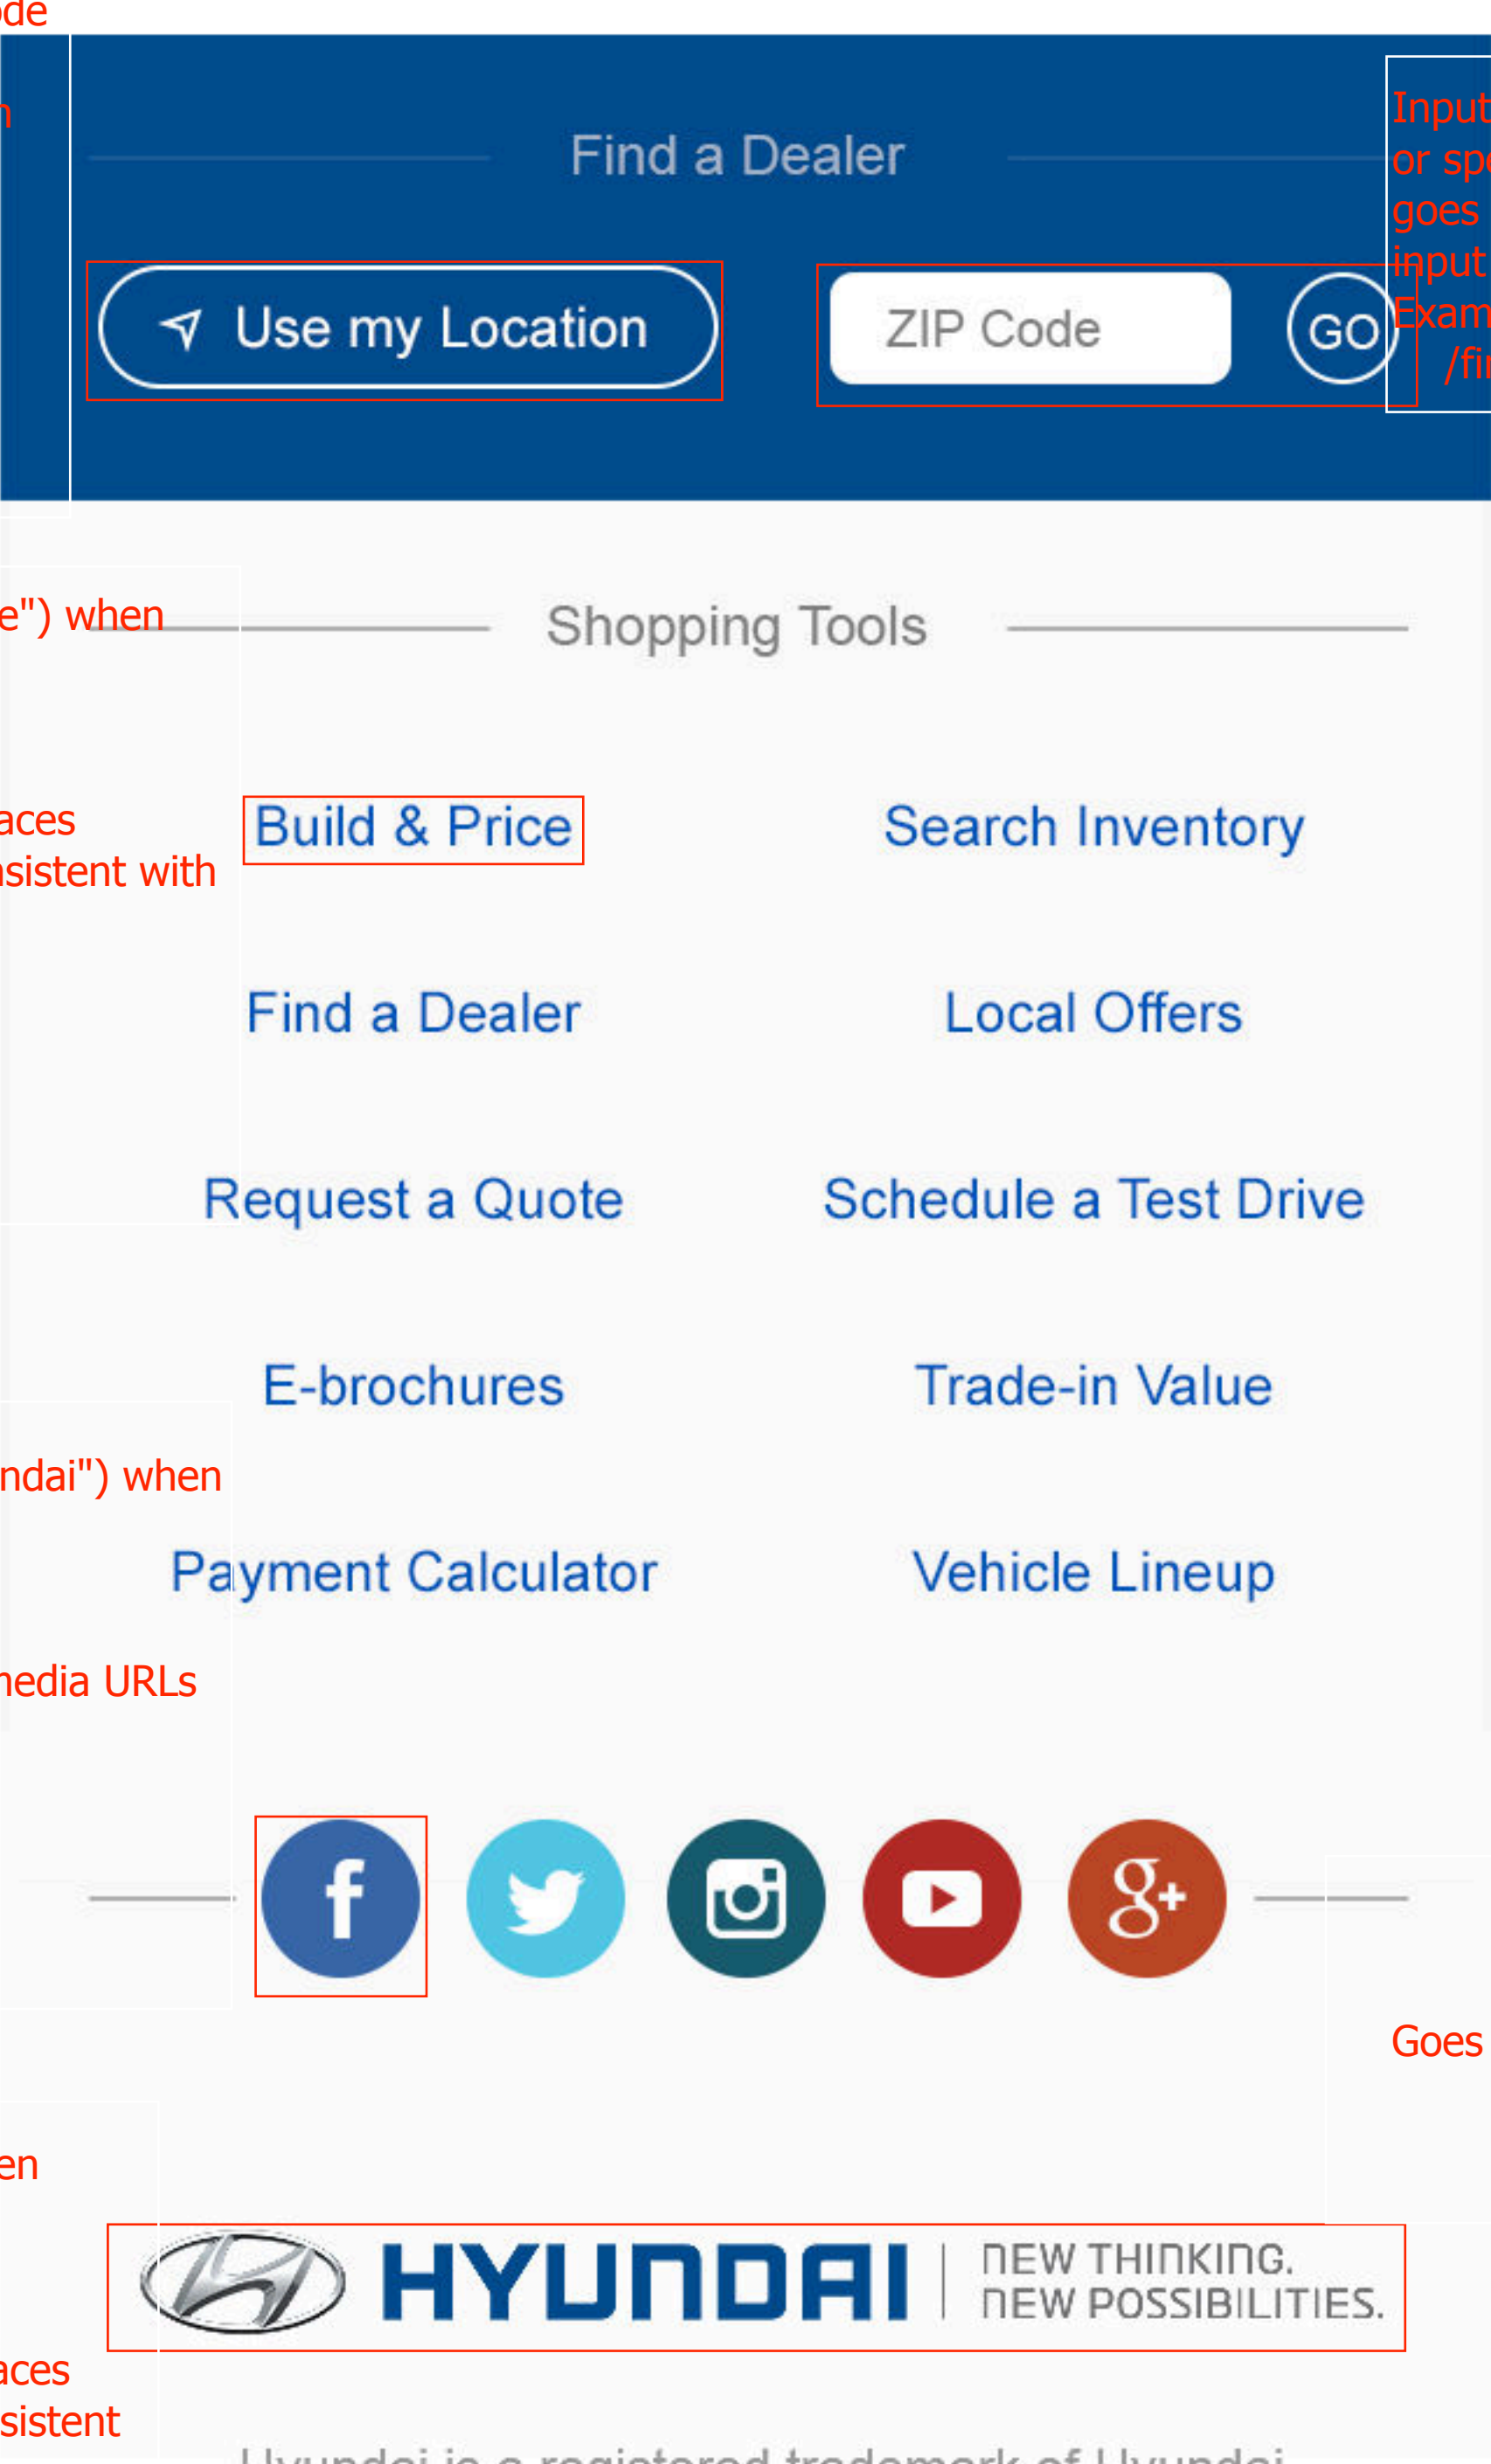

URLs should be lower case, have spaces replaced with dashes ("-"), and be consistent with the text style.

Examples:

- Terms of use: /terms-of-use

- Privacy: /privacy

- Legal: /legal

Goes to the site root ("/") when clicked.
